Business Update Q2 2023

Volumes in the US improved compared to Q1 2023 but were below last year due to a strong comparator with shipment of some large orders in Q2 2022. The EBITDA margin for Q2 2023 is back in line with historical performance after a temporary drop affected by higher raw material costs following the change of our main yarn supplier in 2022 which was finalized in Q1 2023.

In Europe, Q2 2023 results have been affected by lower volumes due to low footfall in the Residential segment and delay of Commercial projects. Unitary margins have improved compared to prior year due to sales price increases, despite peak raw material purchasing prices of last year affecting the Q2 2023 P&L due to First-in, First-out (FIFO) accounting.

Since the start of this year, we managed to open additional ways of raw materials sourcing globally lowering our purchasing prices. From a cash-flow standpoint, Belysse has already started to benefit from this new procurement strategy and the lower cost of energy vs 2022. If these lower costs had impacted the results immediately since the beginning of the year, our results of the European division for H1 2023 would have been higher by €4.5m. However, with FIFO accounting practice, these lower purchase prices will impact the results in H2 2023.

In response to the current weak demand across the European market, a fixed cost reduction program was implemented early July. We expect an in-year 2023 fixed cost reduction of €1.7m and an annualized permanent impact of €3.4m.

With the cost and cash flow improvements described above, assuming all else remains materially unchanged, Belysse is expecting a full year 2023 EBITDA above 2022 levels and a year-end leverage below 4.0x.

¹ As defined in the SSN facility agreements, excluding IFRS16 impact but including sale and leasebacks

Glossary: Alternative Performance Measures

The following alternative performance measures (non-IFRS) have been used as management believes that they are widely used by certain investors, securities analysts and other interested parties as supplemental measures of performance and liquidity. The alternative performance measures may not be comparable to similarly-titled measures of other companies, have limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of our operating results, our performance, or our liquidity under IFRS.

Organic Growth is defined as growth excluding (i) FX impacts, which comprise the translation of key foreign entities and (ii) M&A impacts.

Adjusted EBITDA is defined as operating profit / (loss) adjusted for (i) the impact of the purchase price allocation mainly on change in inventories, (ii) gains on asset disposals, (iii) integration and restructuring expenses, (iv) depreciation / amortization and (v) impairment and write-offs.

Adjusted EBITDA margin is defined as the Adjusted EBITDA as a percentage of revenue.

Gross Debt is defined as (i) Senior Secured Notes adjusted for the financing fees included in the carrying amount and (ii) Bank and other borrowings adjusted for capitalized financing fees.

Net Debt is defined as (i) Senior Secured Notes adjusted for the financing fees included in the carrying amount, (ii) Bank and other borrowings adjusted for capitalized financing fees less (iii) cash and cash equivalents.

Leverage is defined as the ratio of Net Debt to Adjusted EBITDA (both excluding IFRS 16 impacts as per financing documentation, except for sale and leaseback transactions).
